SAFE WORLD INSURANCE GROUP (UK) LTD

Strategic Report for the Year Ended 31 December 2021

The Directors present their Strategic Report for the year ended 31 December 2021.

Safe World Insurance Group (UK) Ltd is a small Non-Solvency II Directive Firm, operating in the niche market of Deposit Protection Insurance and Insurance Backed Guarantees in the Home Improvement Industry. The Company is authorised by the Prudential Regulation Authority and regulated by the Prudential Regulation Authority and Financial Conduct Authority.

Review of business

We have continued to underwrite Deposit Protection Insurance and Insurance Backed Guarantees for the Home Improvement Industry.

Despite the continued impact of Covid-19 and the challenges it brings for businesses and consumers, 2021 has been a positive year for the home improvement industry. Despite some relaxations in Covid-19 restrictions during the year, consumers have continued to purchase home improvements products and installers have robust order books reaching into 2022. The schemes and brokers we underwrite have continued to attract further installers and the combination of these, has resulted in a very positive year with policies and written premium exceeding management expectations.

Our products protect policyholders who have an underlying defect in an installation, where their installer has ceased to trade, and 2021 has seen a relatively low number of insolvencies in the Home Improvement Industry. Our risk analysis considers the longer-term impact on the economy caused by Covid-19 and circumstances where the construction industry may be adversely impacted, such as changes to Covid-19 economic support, the ongoing consequences of Brexit, and other supply chain issues that could lead to an adverse impact on our claims experience.

2021 Financial Review

2021 has been a positive year. We exceeded management expectations for written premium and new policies, whilst managing our expenses during what is still an uncertain period. We also completed the assignment of a portfolio of policies from Safe World Insurance Group International Ltd in Guernsey, following agreement by the UK and Guernsey regulators, see note 25.

	31 December 2021	31 December 2020
Gross Written Premium	£4,666,695	£2,386,257
Loss Ratio	19.1%	14.1%
Expense Ratio	43.7%	63.8%
In force Policies	916,190	369,910
Profit after tax	£1,328,127	£629,182

Total assets were £13,008,714 (2020 - £7,215,092) at the year end, with cash at bank of £12,576,283 (2020 - £6,734,660) and shareholders' funds of £4,122,307 (2020 - £2,644,180). We consider this to be a good performance and provides a solid base on which to develop our business in accordance with our strategy and business plan.

SAFE WORLD INSURANCE GROUP (UK) LTD

Strategic Report for the Year Ended 31 December 2021

Principal risks and uncertainties

Underwriting Risk

The Company underwrites general insurance policies with terms from 1 to 25 years. The principal underwriting risks facing the Company arise from a deterioration of claims experience or increased average claims costs. Claims performance and loss ratios are reviewed regularly in line with our Risk Management Framework and monitored by the Board.

Market Risk

Monies are currently held in cash and fixed interest bonds with two separate UK Banks, rated A+ by Standard and Poor. We have reviewed our investment strategy in 2021 and have appointed a recognised fund manager. This should provide a higher return than through the Banks over the long term and reduce our concentration of risk with a positive impact on our solvency.

The impact of Covid-19, or the impact of Brexit, could result in an economic downturn, which could lead to a reduction in home improvement activity to which our products are linked. As we implement our investment strategy, this could also impact the funds held. The Directors have considered the potential impact and are confident that the Company remains well placed to grow but continue to monitor existing risks and potential future market risks.

Regulatory Risk

We operate in a highly regulated environment. We are fully aware of the negative impact from failures to meet regulatory requirements. The systems and controls we have adopted are designed to ensure compliance with regulatory requirements.

Operational Risk

We understand that all companies have an exposure to operational risk. We operate a Risk Management Framework to ensure that we understand, monitor and mitigate our exposure to operational risk and identify new and emerging risks as well as monitoring changes in existing risks.

We established our first formal Board Committee in 2021, setting up an Audit and Risk Committee to allow the Board to focus on our strategic agenda. Further Board Committees are likely to be added as we grow. We recruited an additional Independent Non-Executive Director, with the appropriate qualifications and skills to chair this committee.

We will continue to monitor and develop our systems and controls to underpin our Risk Management Framework.

Liquidity Risk

We retain adequate levels of liquid cash, which is regularly monitored, in line with our Risk Management Framework.

Currency, Credit and Interest Rate Risks

These do not represent significant risks, but we monitor these in line with our Risk Management Framework. Further information on each of these risks is detailed in Note 24.

Solvency directive

We are authorised as a Non-Solvency II Directive firm and fully understand the requirements, limitations and restrictions as detailed in the Prudential Regulation Authorities Rulebook for Non-Solvency II Directive firm and the Financial Conduct Authority rules.

SAFE WORLD INSURANCE GROUP (UK) LTD

Strategic Report for the Year Ended 31 December 2021

Future developments

As with previous years, we aim to continue building on our unique footprint within the Home Improvement Industry. The provision of a stable UK insurer assists the schemes and brokers who utilise us as their Underwriter to further grow their business and their standing in this market, providing a trusted brand for the end consumer.

Whilst remaining cautious of the impact of Covid-19 and post Brexit challenges, we are optimistic 2022 can be another positive year and one where we again see strong premium performance both from the existing schemes, and from brokers who have chosen us as their Underwriter and potential new business opportunities.

The Government has continued to support its 'Green Industrial Revolution', originally announced in November 2020 with the aim of turning the UK into the world's number one centre for Green Technology.

The UK Government is committed to reducing greenhouse gas emissions of CO₂ to a 'net zero' position to reduce the impact of global warming. In November 2021 it hosted the postponed Conference of the Parties (COP 26) on the subject of climate change, in Glasgow, and there was widespread agreement in relation to the development and use of green technologies worldwide to reach 'net zero'. The UK plans include technologies very pertinent to us already, such as the plans to move away from conventional heating boilers to Air Source Heat Pumps, with 600,000 installations planned per year by 2028; and legislation to phase out the sale of petrol and diesel cars by 2030. It is anticipated this will result in a move to Electric Vehicles.

We underwrite policies for Air Source Heat Pumps and EV Charging points as well as other energy efficient Home Improvement products. These, coupled with other Government incentives or policies, could see a further need for additional Insurance Backed Guarantees in future years.

As our headcount grows, we have identified alternative larger offices, approximately 4 miles from our existing offices and we hope to relocate there in Spring 2022.

SAFE WORLD INSURANCE GROUP (UK) LTD

Strategic Report for the Year Ended 31 December 2021

Section 172 (1) statement

The likely consequences of any decision in the long term (our long-term strategy)

A key reason for our initial establishment, was to ensure the provision of a stable UK insurer to several consumer protection schemes alongside a specialist insurance intermediary, who several of our shareholders were involved with. This was intended to provide those businesses, their members and the end consumers (our policyholders) with the confidence of dealing with a UK insurer who understood the market, whereas most other Underwriters of Insurance Backed Guarantees were based outside the UK and whose main markets were not the provision of Insurance Backed Guarantees.

We have been approached with new business opportunities in 2021 from independent parties, and whilst these did not fit within our appetite, should the right opportunity arise, we would consider this. A key consideration will remain balancing future growth opportunities against the needs of the existing businesses for whom we underwrite policies and the end consumer. Our long-term strategy remains to deliver long-term protection at competitive premiums, with clear and fair policies, all backed up by a quality service to our policyholders.

The Interests of our employees

We operate with a relatively small number of employees, supported by a small number of firms who provide some outsourced functions (our 'Team'). As a small niche insurer, our Team is fundamental to our success and we provide an environment that inspires and encourages them to learn and develop, to enable their growth, benefiting both them and us. Staff are encouraged to highlight ways of working smarter and as a small Team they get to see the results of this. Board Members know every member of our Team and regularly interact with them. The wellbeing of our Team is paramount, and this was never more so, than throughout the Covid-19 pandemic. Our Team is able to switch from office working to working from home, when necessary. Our headcount has increased during 2021, however, we anticipate further modest increases in 2022 and beyond.

Fostering our business relationships with suppliers, customers and others

We have highlighted under our opening paragraph in the Section 172 (1) statement, the importance of our relationships with the businesses who have chosen us as their Underwriter and our continuing relationship with these firms is as important to us as the quality of our service and relationship is to them. Whilst there is some commonality with some of the shareholders in our businesses, all parties work collaboratively to ensure our relationship continues to be successful.

As highlighted above we have a small number of firms who provide some outsourced functions. They form part of our Team and our relationship with them is important and one we regularly ensure is effective from both perspectives. Whilst it is strong, it is not taken for granted. These firms know that longer term as we grow some outsourced functions may eventually become in-house ones and they acknowledge and will support this. The skillset they provide, such as accounting and actuarial services is important, but is something that is available through other suppliers should we need to make a change.

We also utilise a panel of Approved Installers for claims remedial work. These are independent contractors, of varying sizes and skillsets for the home improvement installation types we cover. Our panel can change, although some of the panel have worked with some of the Board for many years. All panel contractors provide quality services to claimants and to us, whilst allowing us to control and mitigate our claims costs. This relationship is mutually beneficial and one that we continually monitor from a service quality, performance, and cost management perspective.

The impact of our operations on the community and the environment

The Board are aware of the regulatory consultations and policy statements for insurers and understand their importance. Whilst the impact on our operation and on the policies we underwrite is not significant, we continue to monitor and discuss this. Where possible we look to minimise our footprint, for example, by avoiding unnecessary travel, using video conferencing or digital communication methods, utilising the business park's recycling facilities and where possible recruiting staff from the local area.

Our considerations for a new office to meet our growing headcount included environmental considerations, ensuring we remained in the local area, with good transport links and at a site where its environmental considerations match ours.

We will also consider the environmental impact on our investment strategy in 2022.

Our desire to maintain a reputation for high standards of business conduct

As an authorised insurer, the Board are fully committed to maintaining high standards of business conduct and the fair treatment of customers.

SAFE WORLD INSURANCE GROUP (UK) LTD

Strategic Report for the Year Ended 31 December 2021

How we act fairly between members of the Company

Our Board has a full time Managing Director, an Independent Non-Executive Chairman and an Independent Non-Executive Chair of the Audit and Risk Committee. Our fourth Board Member represents the largest shareholder and we ensure that there is appropriate communication with the minority shareholders who are not represented on the Board.

On behalf of the board:

D J Bond – Managing Director

Date: 14th March 2022

.....
S J Payne – Independent Non-Executive Chairman

Date: 14th March 2022

SAFE WORLD INSURANCE GROUP (UK) LTD

Report of the Directors for the Year Ended 31 December 2021

The Directors present their report with the financial statements of the Company for the year ended 31 December 2021.

The Company has chosen, in accordance with S414c (ii) of the Companies Act, to disclose the information relating to principal risks and uncertainties, review of business and key performance indicators in the Company's Strategic Report.

Principal activities

The principal activities of the Company in the year under review were those of underwriting insurance business. A review of the year is included within the Strategic Report.

Dividends

No dividends will be distributed for the year ended 31 December 2021.

Going concern basis

The Company has considered budgets and forecasts to determine financial resources and, as a consequence, the Directors believe that the Company is well placed to manage its business risks and continue in operational existence for the foreseeable future. Accordingly, they have adopted the going concern basis in preparing these financial statements.

Directors

Other than MI Dugdale, the Directors shown below have held office during the whole of the period from 1 January 2021 to the date of this report.

J R Christie

D J Bond

S J Payne (Non-Executive Director)

M I Dugdale (Non-Executive Director) - appointed 28 April 2021

Statement of Directors' responsibilities

The Directors are responsible for preparing the Strategic Report, the Report of the Directors and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under Company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

SAFE WORLD INSURANCE GROUP (UK) LTD

Report of the Directors for the Year Ended 31 December 2021

Statement as to disclosure of information to auditors

So far as the Directors are aware, there is no relevant audit information (as defined by Section 418 of the Companies Act 2006) of which the Company's auditors are unaware, and each Director has taken all the steps that he ought to have taken as a Director in order to make himself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

On behalf of the board:

.....
D J Bond – Managing Director

Date: 14th March 2022

.....
S J Payne – Independent Non-Executive Chairman

Date: 14th March 2022

Report of the Independent Auditors to the Members of Safe World Insurance Group (UK) Ltd

Opinion

In our opinion the financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2021 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Safe World Insurance Group (UK) Ltd (the 'Company') for the year ended 31 December 2021 which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity, Statement of Cash Flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and Financial Reporting Standard 103 'Insurance Contracts' (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Other information

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and Report of the Directors for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and Report of the Directors have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report or the Report of the Directors.

Report of the Independent Auditors to the Members of Safe World Insurance Group (UK) Ltd

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of Directors

As explained more fully in the Statement of Directors' Responsibilities, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Extent to which the audit was capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

- Our responses to significant audit risks (valuation of technical provisions, revenue recognition and management override of controls) are intended to sufficiently address the risk of fraudulent manipulation;
- Considering areas where management make subjective judgements, for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. We ensured that our audit procedures performed covered these risks. In addition, we reviewed adjustments made to the financial statements, unusual journal postings and the timing of revenue recognition around the year end;
- Engaging an independent internal actuary as auditor's expert to review the assumptions and methodology applied by the Company in the valuation of technical provisions to check the methods utilised are appropriate for the classes of business written;
- Obtaining an understanding of the legal and regulatory framework applicable to the Company's operations and the control environment in monitoring compliance with the laws and regulations;
- Review of correspondence with the Prudential Regulation Authority (PRA) and Financial Conduct Authority (FCA);
- Communication of the relevant identified laws and regulations and potential fraud risks to all engagement Team members, discussion of how and where these might occur and remaining alert to any indications of fraud or non-compliance with laws and regulations throughout the audit;
- Enquiries of management;
- Review of minutes of board meetings throughout the period; and
- Agreement of the financial statement disclosures to underlying supporting documentation.

Our audit procedures were designed to respond to risks of material misstatement in the financial statements, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery, misrepresentations or through collusion. There are inherent limitations in the audit procedures performed and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we are to become aware of it.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our Report of the Auditors.

Report of the Independent Auditors to the Members of Safe World Insurance Group (UK) Ltd

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements for the Year Ended 31 December 2021

1. Statutory information

Safe World Insurance Group (UK) Ltd is a private Company, limited by shares, incorporated and registered in England and Wales. The Company's registered number and registered office address can be found on the Company Information page.

2. Accounting policies

Basis of preparing the financial statements

The financial statements have been prepared under the historical cost convention. They are prepared in accordance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"), FRS 103 "Insurance Contracts: Consolidated accounting and reporting requirements for entities in the UK and Republic of Ireland issuing insurance contracts" ("FRS 103") and the Companies Act 2006.

The preparation of financial statements in conformity with FRS102 and FRS103 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the accounting policies selected for use by the Company. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3. Use of available information and application of judgement are inherent in the formation of estimates. Actual outcomes in the future could differ from such estimates.

Going concern

The financial statements have been prepared on a going concern basis. The Directors have satisfied themselves that this basis is appropriate as the Company is well placed to manage its business risks and continue in operational existence in line with the regulatory solvency requirements. The Directors have reviewed the cash flow and projected income and expenses over the next twelve months and deemed that the Company has adequate financial resources to meet its obligations as they fall due.

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

2. Accounting policies - continued

Insurance contracts

i) Classification

The Company issues contracts that transfer insurance risk which are classified as insurance contracts. As a general guideline, the Company defines significant insurance risk as the possibility of having to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. These contracts remain insurance contracts until such time as all rights and obligations under the contract are extinguished or expire.

ii) Gross written premiums

Gross written premiums comprise premiums on contracts inception during the period, together with any adjustments arising in the reporting period to such premiums. Gross written premiums are accounted for at the date of inception of the policy to which they relate. Premiums are shown gross of commissions but excluding taxes and duties levied on them, other than whereby policies are issued to intermediaries on a wholesale basis and they themselves are responsible for setting the final amount payable by the insured without reference to the insurer, in this scenario grossing up will be inappropriate.

iii) Unearned premiums

Unearned premiums represent the proportion of premiums written that relate to unexpired terms of policies in force at the Statement of Financial Position date, calculated on a combination of time apportionment and risk profile of the policy.

iv) Commissions

Commissions arise from the conclusion of insurance contracts and are expensed in the same period as the premiums to which they relate.

v) Claims incurred

Claims incurred comprise claims and related expenses paid in the period, and the change in provision for claims payable. Where applicable, deductions are made for salvage and other recoveries. Claims paid are calculated in accordance with the terms of each insurance agreement and are recognised as an expense when due for payment to the insured.

Gross claims incurred comprise the estimated cost of all claims occurring during the year, whether reported or not, including related direct and indirect claims handling costs and adjustments to claims outstanding from previous years.

Claim provisions

The provision for reported claims outstanding is assessed on an individual case basis and is based on the estimated ultimate cost of all claims notified but not settled by the Statement of Financial Position date.

The claims provision also includes the estimated cost of claims incurred but not reported ("IBNR") at the Statement of Financial Position date based on statistical methods.

These methods generally involve projections of historic claims development patterns to form a view of the likely ultimate amounts to be paid after the Statement of Financial Position date for undeveloped accident periods. Where there is a low volume of historic claims, additional sources of data may be used including that relating to similar insurance products. The IBNR provision for the Company has been set using a combination of a loss ratio approach, which is common for new lines of business where historical loss experience is not available or where the number of reported claims is low, and the results from a standard actuarial claims development investigation.

The most critical assumption underlying the calculation of the claims provisions is that past claims development patterns are a reasonable predictor of future patterns.

No reinsurance is in place and so there are no reinsurance recoveries on any claims.

The Directors consider that the provision for gross claims and IBNR is fairly stated on the basis of the information currently available to them. However, the ultimate liability will vary as a result of subsequent information and events and this may result in significant adjustments to the amounts provided. Adjustments to the amounts of claims provisions established in prior years are reflected in the financial statements for the period in which the adjustments are made. The methods used, and the estimates made, are reviewed regularly.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

2. Accounting policies - continued

Other income

Administration fees are recognised at the point of receipt and, although attracting Insurance Premium Tax (IPT), do not form part of Premiums received.

Administration fees are charged to the schemes for administrative services related to the policies written and are not related to the insurance risk arising on individual policies. The administration fees are not refundable after receipt, in accordance with the contracts with the schemes.

The attracted IPT is declared and paid every quarter to HMRC.

Other income – non-technical

Ancillary fees are recognised when the service has been performed.

Government grants

Government grants are recognised in income when the grant proceeds are received or receivable.

Intangible assets

Intangible assets are initially measured at cost. After initial recognition, intangible assets are measured at cost less any accumulated amortisation and any accumulated impairment losses.

Computer software is being amortised evenly over its estimated useful life of four years.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Fixtures and fittings	- 20% straight line
Computer equipment	- 33% straight line

Tangible fixed assets are stated at cost (or deemed cost) or valuation less accumulated depreciation and accumulated impairment losses.

Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

All financial assets and liabilities are initially measured at transaction price, adjusted for transaction costs except for those financial instruments subsequently measured at fair value through profit or loss, unless the arrangement constitutes a financing transaction.

Financial assets are derecognised when, and only when, a) the contractual rights to the cash flows from the financial asset expire or are settled or b) the Company transfers to another party substantially all the risks and rewards of ownership of the financial asset. Financial liabilities are derecognised only when the obligation specified in the contract is discharged, cancelled or expires.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

2. Accounting policies - continued

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Statement of Comprehensive Income - non-technical account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the Statement of Financial Position date.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the Statement of Financial Position date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Functional and presentational currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Pounds Sterling ('GBP' or '£') which is the Company's functional and presentation currency.

Pension costs and other post-retirement benefits

The Company operates a defined contribution pension scheme. Contributions payable to the Company's pension scheme are charged to profit or loss in the period to which they relate.

Insurance receivables and payables

Receivables and payables arising under insurance contracts are recognised when due and measured at amortised costs, using the effective interest rate model. Those payables and receivable within one year are measured at the undiscounted amount of the cash or other consideration expected to be paid or received as long as the arrangement does not constitute a financing arrangement. A provision for impairment is established when there is objective evidence that, as a result of one or more events that occurred after the initial recognition, the estimated future cash flows have been impaired.

Other debtors and creditors

Short term debtors are measured at transaction price less any impairment. Short term creditors are measured at the transaction price.

Cash and cash equivalents

Cash and cash equivalents are highly liquid investments that are subject to insignificant risk of changes in value and consist of deposits held with banks with original maturities of three months or less.

Impairment of financial assets

At the end of each reporting period, financial assets are assessed for objective evidence of impairment. An impairment loss is recognised in the Statement of Comprehensive Income – non-technical account where the carrying amount of the financial asset is greater than its fair value. If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed to the extent that the carrying amount of the asset does not exceed the amount which would have been reported had the impairment not previously been recognised. The reversal is recognised in the Statement of Comprehensive Income – non-technical.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

3. **Critical accounting judgements and key sources of estimation uncertainty**

In the application of the Company's accounting policies, which are described in Note 2, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities which are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Company's accounting policies

The following are the critical judgments, apart from those involving estimations (which are dealt with separately below), that the Directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Unearned premium reserves

The Directors use their judgement in selecting appropriate earnings patterns for the business underwritten and associated acquisition costs and the pattern used is predominantly straight-line pattern over the life of the policy. To reflect the period of risk these patterns are calculated with reference to the inception and expiry dates of the policies concerned. At the reporting date the carrying amount for the unearned premium reserve (UPR) is £7,929,757 (2020: £3,982,315).

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Valuation of liabilities of non-life insurance contracts

Estimates are made for both the expected ultimate cost of claims reported and claims incurred but not reported at the reporting date. The estimate of incurred but not reported (IBNR) claims is generally subject to a greater degree of uncertainty than that for reported claims. The outcome of claims can significantly deviate from both the initial estimates and the estimates as disclosed in the financial statements. In calculating the estimated liability, the Company uses a variety of estimation techniques based upon statistical analyses of historical experience, from other Group entities and other market sources, which assumes past trends can be used to project future developments. The gross amount for non-life insurance contract liabilities, the summation of the claims reserve for reported claims, IBNR and UPR, at the Statement of Financial Position date is £8,292,707 (2020: £4,162,297).

4. **Gross premiums written**

The gross premiums written and profit before taxation are attributable to the principal activities of the Company.

The Company writes a single class of business, all of which is in the UK.

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

8. Profit before taxation

The profit is stated after charging:

	2021 £	2020 £
Depreciation - owned assets	3,789	3,288
Computer software amortisation	3,687	3,687
Audit fees	<u>36,600</u>	<u>32,400</u>

9. Taxation

Analysis of the tax charge

The tax charge on the profit for the year was as follows:

	2021 £	2020 £
Current tax:		
UK corporation tax on profit	<u>313,300</u>	<u>149,227</u>

Reconciliation of total tax charge included in profit and loss

The tax assessed for the year is higher than the standard rate of corporation tax in the UK. The difference is explained below:

	2021 £	2020 £
Profit before tax	<u>1,641,427</u>	<u>778,409</u>
Profit multiplied by the standard rate of corporation tax in the UK of 19% (2020 - 19%)	311,871	147,898
Effects of:		
Expenses not deductible for tax purposes	9	604
Depreciation in excess of capital allowances	<u>1,420</u>	<u>725</u>
Total tax charge	<u>313,300</u>	<u>149,227</u>

10. Net operating expenses - technical account

	2021 £	2020 £
Administrative expenses	660,810	413,449
Auditor's remuneration	<u>36,600</u>	<u>32,400</u>
	<u>697,410</u>	<u>445,849</u>

Premium is agreed with intermediaries on a wholesale basis and the company has no control over the level of commission, which is determined by the intermediary. Accordingly, acquisition costs are not recognised in the financial statements.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

24. Insurance and financial risk management

The Company's activities expose it to a variety of insurance and financial risks. The Board of Directors has overall responsibility for the establishment and oversight of the Risk Management Framework. The aim of the framework is to achieve the appropriate balance between risk and return and minimise potential adverse effects on the Company's financial performance.

The Board of Directors has implemented policies to assist with the management and monitoring of insurance risks, with ultimate responsibility for risk management residing with the Board.

The significant risks facing the Company are insurance risk; market risk which includes currency risk and interest rate risk; liquidity risk; credit risk; and operational risk, which is managed through the Risk Management Framework.

Insurance risk

The Company issues contracts that transfer insurance risk or financial risk or both.

Insurance risks relate to the risks involved in underwriting the business. This comprises pricing (the risk that underlying business is under-priced) as well as the risk of a greater number of large losses than assumed. This also includes reserving risk, which is the risk that actual claims payments are significantly higher than the amounts included within the technical provisions. This could occur because the frequency or severity of claims are greater than estimated. Insurance events are uncertain and the actual number and amount of claims may vary from year to year from the estimate established.

Other factors which influence insurance risk relate to concentration, including the quantum of a particular risk type underwritten and exposure split based on the geographical location and type of home improvement.

The Company manages these risks through an underwriting strategy that is approved by the Board after having considered experts' advice. The contracts issued by the Company are issued with limits on event or aggregate liability towards the policyholder. The Company seeks professional advice to support the Directors' view on the adequacy of its loss reserves for its business.

The estimated cost of claims includes direct expenses to be incurred in settling claims. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is possible that the final outcome will prove to be different from the original liability established.

Due to the low level of claims in the year, the Company has estimated the required claims provisions using a combination of an estimated loss ratio as calculated by the actuary and the historical claims development experience of the Company and other insurer's underwriting similar products.

Sensitivities

The claim liabilities are sensitive to the claim frequency and the average cost per claim, which combine to result in a change in the loss ratio. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process.

Claims Development

Claims are typically settled within one year of notification and as such, no claims development tables are presented.

31 December 2021 Loss Ratio

As part of the firm's regular sensitivity testing, the impact of movements in key results on the technical account and solvency position is monitored. The impact of a 10% movement in the loss ratio on the technical account is £30,543 (2020: £9,874). A 10% movement in the loss ratio is broadly equivalent to the increase which would result from the insolvency of one additional large installer.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

24. Insurance and financial risk management - continued

Financial instruments

The following table outlines the Company's exposure to financial assets by credit quality:

	S&P Rating	2021 £	2020 £
Financial assets			
Debtors arising out of insurance operations	unrated	425,028	465,553
Cash at bank and in hand	A+	<u>12,576,283</u>	<u>6,734,660</u>
		<u>13,001,311</u>	<u>7,200,213</u>

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices driven by factors such as movements in currency and exchange rates, interest rates and other price changes.

The following policies and procedures are in place to mitigate the exposure to market risk:

- Market risk is considered in the Risk Appetite Framework. Compliance is monitored and exposures and breaches are reported to the Board. The policy is reviewed regularly for pertinence and for changes in the risk environment.
- Strict control over nature, quality and type of investments.
- For assets backing outstanding claims provisions, market risk is managed by matching the duration and profile of assets to the technical provisions they are backing. This helps manage market risk to the extent that changes in the values of assets are matched by a corresponding movement in the values of the technical provisions.

Currency risk

Currency risk arises when future commercial transactions or recognised assets and liabilities are denominated in a currency that is not the entity's functional currency. The Company is not exposed to foreign exchange risk as it transacts business and holds amounts in its functional currency.

Interest rate risk

Interest rate risk is the risk that the value of future cash flows of a financial instrument will fluctuate because of differences in market interest rates.

Interest rate risk is managed by investment guidelines set out by the Company. The Company's investments as at year end comprises cash and short-term Bonds with A+ Rated UK Banks and are not materially sensitive to interest rate risk due to the low interest rate regime in the market.

Liquidity Risk

Liquidity risk is the risk that the Company, although solvent, either does not have available sufficient financial resources to enable it to meet its obligations as they fall due or can secure them only at excessive cost. The Company retains enough liquid cash in line with its Risk Management Framework and this is regularly monitored.

Credit Risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due. Areas where the Company is exposed to credit risk are: trade debtors and cash and cash equivalents. Trade debtors are considered fully receivable and ongoing monitoring is undertaken. No balances are past due or impaired. Cash balances are held with Lloyds Bank and HSBC Bank.

Cash and cash equivalents

The risk is managed within the Company's Risk Management Framework, which is regularly reviewed by the Audit & Risk Committee of the Company, reporting to the Board. The Company's cash is held with Lloyds Bank and HSBC Bank, both of which have a credit rating of A+ with Standard & Poor's.

SAFE WORLD INSURANCE GROUP (UK) LTD

Notes to the Financial Statements - continued for the Year Ended 31 December 2021

24. Insurance and financial risk management - continued

Capital management

Capital management includes the assessment of capital required to support the Company's plans and objectives, the structure of its shareholder's funds, arrangements to secure capital, and the ongoing monitoring of capital against business requirements. The Company is regulated by the Financial Conduct Authority (FCA) and Prudential Regulation Authorities ("PRA"). As a result, the Company must maintain capital resources as prescribed by its regulators.

We were authorised as a Non-Solvency II Directive firm and fully understand the requirements, limitations and restrictions as detailed in the Prudential Regulation Authorities Rulebook for Non-Solvency II Directive firm and the Financial Conduct Authority rules.

The Company's objectives when managing capital are:

- i) to comply with legal and statutory obligations and maintain capital resources commensurate with the nature, scale and risk profile of its business;
- ii) to provide a framework for monitoring the financial and capital position of the Company, including the procedures to be followed during period of general financial distress, either due to internal or external events; and
- iii) to safeguard the Company's ability to continue as a going concern.

Management information to monitor the Company's capital requirements and solvency position is produced and presented to the Board on a regular basis ensuring that the Company meets its capital requirements at all times.
